### **CHINA WIRELESS ANNOUNCES COOPERATION WITH CHINA NETCOM BEIJING COMPANY TO DEPLOY BROADBAND CAPABILITIES**

DENVER, CO March 8, 2004/PRNewswire-FirstCall -- China Wireless Communications, Inc. (OTCBB: CWLC) announces it has signed a cooperative agreement with China Netcom Beijing Company. According to the agreement, China Netcom Beijing Company will provide high quality broadband width to China Wireless as well as its customers. China Wireless will be able to use China Netcom's Metropolitan Access Network in Beijing, allowing it to greatly expand the service area and the number of potential customers it may serve. We anticipate this agreement will allow our two companies to build alliances in various new businesses including but not limited to IDC, VPN, and IP, etc.

China Netcom owns one of the largest optic fiber backbone networks across China, and is one of the largest companies in China. This agreement with China Netcom will facilitate China Wireless' to expand its customer base immediately. At the same time, by using the high quality wireless broadband technology supplied by China Wireless, China Netcom will be able to extend its broadband access to cover more of its customers.

Mr. Brad Woods, CEO of China Wireless commented, "Our strategic partnership with China Netcom gives us a strong partner in China's highly-regulated telecom industry, and is a milestone in our development in China. Meanwhile, one of our most important strategies is to position and obtain customers by assisting our partners in solving its last mile customer connectivity issue. We believe this cooperative agreement with China Netcom validates the strategy the company is following to implement our business plan successfully."

#### **About China Netcom Corporation Ltd.:**

China Netcom Corporation Limited ("CNC") is a facilities-based broadband telecommunications operator in China. It provides a full spectrum of services and solutions to meet the broadband telecommunications needs of businesses and individuals. Its core business includes providing Internet broadband access and integrated telecom services to residential and corporate customers, and building the infrastructure for China's New Economy. Its comprehensive collection of telecom licenses, including the license to operate international gateways out of China, puts it in peer with incumbent operators such as China Telecom.

In August 1999, China Netcom was founded by four entities affiliated with the Chinese government: (i) the Chinese Academy of Sciences ("CAS"); (ii) the State Administration of Radio, Film and Television ("SARFT"); (iii) the Ministry of Railways ("MOR"); and (iv) the Shanghai Municipal Government.

CNC's core competence lies in its strong shareholder support, a new generation of modern management, and best-of-breed technology. In 2000, CNC has finished the first phase construction of a nationwide fiber optic backbone network, CNCNet and metropolitan access network, which pioneered the deployment of advanced IP over DWDM transmission technology in the world.

**About China Wireless Communications, Inc.:**  
([www.chinawirelesscommunications.com](http://www.chinawirelesscommunications.com))

China Wireless Communications, Inc. based in Denver, CO develops, installs and markets wireless broadband networks and provides internet access in Beijing, China.
