CHINA WIRELESS COMMUNICATIONS LIGHTS FIBER NETWORK IN BEIJING

Denver, CO, April 15, 2004, China Wireless Communications, Inc. (OTC Bulletin Board: CWLC) is pleased to announce that it has completed the first phase of its metropolitan access network around the 4th ring road of Beijing and is actively selling its services to businesses.

This first phase of the China Wireless network is located in the core business district of northern Beijing. China Wireless can now provide high bandwidth business users with high-speed wireless services, Virtual Private Network and other wireless access, transport and enhanced data services. Presently, the company is aggressively negotiating with building management and owners in the core business district to connect their tenants, who are high bandwidth users, to its fiber network.

Mr. Brad Woods, CEO of China Wireless Communications, commented, "The deployment of our fiber network completes the first phase of meeting the demand of high bandwidth users requiring connectivity to our Tier 1 partners' services. Additionally, we can now deliver broadband access to businesses that were unable to receive broadband services until now. We plan to extend our network's reach to more broadband business users imminently."

About China Wireless Communications, Inc.

www.chinawirelesscommunications.com

China Wireless Communications, Inc., headquartered in Denver, CO provides a suite of broadband data services, including support for Internet access and Voice over IP in Beijing, China through its wholly owned subsidiary, In-Touch Communications. We use secure, reliable fixed wireless technology to provide the 'last mile' connection to link bandwidth-hungry businesses to our fiber-optic backbone, and to the networks of our telecommunications partners. Our "Wireless Fiber" services provide the capacity and reliability of fiber-optic networks, over a fixed wireless connection. As a result, we capitalize on faster deployment and maintain targeted capital spending available only through these advanced technologies. Our systems are used to provide redundant high-speed network access connections, Voice over IP and transport services that include IP data, video and ISP services. The Company is publicly traded on the OTCBB under the symbol "CWLC".

Forward Looking Statements:

Statements regarding financial matters in this press release other than historical facts

are “forward-looking statements” within the meaning of section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934, and as that term is defined in the Private Securities Litigation Reform Act of 1995. The company intends that such statements about the Company’s future expectations, including future revenues and earnings, and all other forward-looking statements be subject to the safe harbors created thereby. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company’s actual results may differ materially from the expected results.
