

CHINA WIRELESS COMMUNICATIONS SIGNS DISTRIBUTION CONTRACT WITH CHINESE ISP PIONEER

Denver, CO, June 4, 2004, China Wireless Communications, Inc. (OTC Bulletin Board: CWLC) announces that it has signed a distribution contract for one year with Netchina Information Technology Company Limited, one of the earliest ISP's in China. This contract allows China Wireless to distribute all Netchina's premier products and services which include network security, network application, network management and finance software.

Kent Lam, President of China Wireless' Beijing operating subsidiary commented, "This contract will meet our existing customers' increasing requirements for value-added services. Our expansion of services will indirectly help us tap into new markets including government, military, petroleum, electric power, aviation, railway, finance, etc, by leveraging Netchina's relationships in these fields."

About Netchina Information Technology Company Limited

(www.netchina.com.cn)

Netchina Information Technology Company Limited, founded in 1995, is one of the earliest ISP in China. It mainly provides products and services in network security, network application, network management and finance software. Using a variety of premier products and services it has obtained substantial customer base in government, army, finance, tax, telecom, petrol, electric power, aviation, railway, education, etc. A few government departments of China, such as the Ministry of Public Security and State Security Bureau, extensively adopt its products and services, in addition, about 40 percent of province-owned television stations use its finance management system. The corporation is located north business center district of Beijing with about 1,400-square-meter operating facilities and is attracting more prominent staff, potentially becoming one of the best ISP in China.

About China Wireless Communications, Inc.

(www.chinawirelesscommunications.com)

China Wireless Communications, Inc., headquartered in Denver, CO provides a suite of broadband data services, including support for Internet access and Voice over IP in Beijing, China through its wholly owned subsidiary, In-Touch Communications. We use secure, reliable fixed wireless technology to provide the 'last mile' connection to link bandwidth-hungry businesses to our fiber-optic backbone, and to the networks of our telecommunications partners. Our "Wireless Fiber" services provide the capacity and reliability of fiber-optic networks, over a fixed wireless connection. As a result, we capitalize on faster deployment and maintain targeted capital spending available only through these advanced technologies. Our systems are used to provide redundant high-speed network access connections, Voice over IP and transport services that

include IP data, video and ISP services. The Company is publicly traded on the OTCBB under the symbol "CWLC".

Forward Looking Statements:

Statements regarding financial matters in this press release other than historical facts are "forward-looking statements". The company intends that such statements about the Company's future expectations, including future revenues and earnings, and all other forward-looking statements be subject to the safe harbors created thereby. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company's actual results may differ materially from the expected results.
