### **CHINA WIRELESS RENEWS CONTRACT WITH PROFESSIONAL LOGISTIC CORPORATION TO INCREASE SERVICE CAPACITY**

Denver, CO, June 18, 2004, China Wireless Communications, Inc. (OTC Bulletin Board: CWLC) announces that it has renewed another technology service contract with Beijing Hezhong Logistic Corporation. The one-year contract expands the three dedicated fiber access, announced on May 17, 2004, to include an additional one megabit per second (Mbps) access; increasing the total service capacity to 4Mbps.

Kent Lam, President of China Wireless's Beijing operating subsidiary commented, "We are very pleased with this renewal and increase of service capacity by our customer. It is a result of our efforts to provide quality and reliable service to our loyal customers. We are continuously enriching our package of services and updating our after-sale service support, which will increase the number of loyal customers like Beijing Hezhong."

#### **About Beijing Hezhong Logistic, Inc:**

Beijing Hezhong, founded in 2000, is engaged in providing professional logistic service. During the past several years it has attained significant performance in the logistic service field. It has over 100 transport vehicles and two storehouses totally about 20,000 square meters. In order to provide better service to its customers, Beijing Hezhong has built a national system of logistic network and a private logistic information system. In 2003, the Committee of China Food Industry awarded Beijing Hezhong recognition as "model base station of food logistic in China" and "model training base station of food logistic in China."

#### **About China Wireless Communications, Inc.**

China Wireless Communications, Inc., headquartered in Denver, CO provides a suite of broadband data services, including support for Internet access and Voice over IP in Beijing, China through its wholly owned subsidiary, In-Touch Communications. We use secure, reliable fixed wireless technology to provide the 'last mile' connection to link bandwidth-hungry businesses to our fiber-optic backbone, and to the networks of our telecommunications partners. Our "Wireless Fiber" services provide the capacity and reliability of fiber-optic networks, over a fixed wireless connection. As a result, we capitalize on faster deployment and maintain targeted capital spending available only through these advanced technologies. Our systems are used to provide redundant high-speed network access connections, Voice over IP and transport services that include IP data, video and ISP services. The Company is publicly traded on the OTCBB under the symbol "CWLC".

**Forward Looking Statements:**

Statements regarding financial matters in this press release other than historical facts are “forward-looking statements”. The company intends that such statements about the Company’s future expectations, including future revenues and earnings, and all other forward-looking statements be subject to the safe harbors created thereby. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company’s actual results may differ materially from the expected results.
