## **CHINA WIRELESS SELECTED TO PROVIDE BROADBAND ACCESS SERVICE TO ANTI-FORGERY BUSINESS IN BEIJING, CHINA**

Denver, CO, July 8, 2004, China Wireless Communications, Inc. (OTC Bulletin Board: CWLC) is pleased to announce that it has signed a technology service contract with Beijing Orient Anti-forgery Company, a leader in anti-forgery services and products in China., China Wireless will provide dedicated broadband access to Beijing Orient Anti-forgery that consists of a 10Megabits per second service.

Mr. Mike Bowden, Vice President of Technology for China Wireless commented, "A number of technology businesses in China are experiencing rapid growth. Their success depends on dedicated, high-speed connectivity to connect their internal operations, and to connect to their trading partners. Beijing Orient Anti-forgery, with a national distribution channel and notable company in its industry is a clear example. This agreement is an exciting opportunity to assist a rapidly-growing leader that provides critical solutions to the Chinese IT market."

### **About Beijing Orient Anti-forgery Company:**

([www.515315.net](http://www.515315.net))

Beijing Orient Anti-forgery Company is a high-tech anti-forgery company located in Zhongguancun, Beijing's silicon valley. It is engaged in research and development of anti-forgery products and services. The company has a number of leading products and patents, which has positioned the company to have substantial influence in the digital anti-forgery business; whereby the company is drafting new anti-forgery standards for the government. The company has established over 10 branches throughout China and extended its business to Hong Kong and Japan.

### **About China Wireless Communications, Inc.**

China Wireless Communications, Inc., headquartered in Denver, CO provides a suite of broadband data services, including support for Internet access and Voice over IP in Beijing, China through its wholly owned subsidiary, In-Touch Communications. We use secure, reliable fixed wireless technology to provide the 'last mile' connection to link bandwidth-hungry businesses to our fiber-optic backbone, and to the networks of our telecommunications partners. Our "Wireless Fiber" services provide the capacity and reliability of fiber-optic networks, over a fixed wireless connection. As a result, we capitalize on faster deployment and maintain targeted capital spending available only through these advanced technologies. Our systems are used to provide redundant high-speed network access connections, Voice over IP and transport services that include IP data, video and ISP services. The Company is publicly traded on the OTCBB under the symbol "CWLC".

**Forward Looking Statements:**

Statements regarding financial matters in this press release other than historical facts are “forward-looking statements”. The company intends that such statements about the Company’s future expectations, including future revenues and earnings, and all other forward-looking statements be subject to the safe harbors created thereby. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company’s actual results may differ materially from the expected results.
