CHINA WIRELESS ANNOUNCES RECORD SALES REVENUE FOR THE SECOND QUARTER 2004

Denver, CO, July 13, 2004, China Wireless Communications, Inc. (OTC Bulletin Board: CWLC) is pleased to announce that its sales revenue for the second quarter 2004 soared to US\$94,000.00, an increase of over 350 percent from first quarter 2004. This explosive growth is a direct result from China Wireless effectively bringing more customers and services onto their Beijing broadband network.

In the first quarter of 2004, China Wireless successfully opened their Beijing metro network for service. Based on initial customer acceptance and burgeoning market demand, China Wireless executed an aggressive expansion of its services to customers in the second quarter. During the period, the completion of the network construction for the second phase also provided more capacity and coverage of services, allowing the company to reach key business objectives. In addition, China Wireless launched its building access program, aimed at providing cost-effective high-bandwidth access services to business tenants in key buildings.

Dr. Allan Rabinoff, Chairman and COO of China Wireless commented, "In the past two quarters, our customer base has grown at a rapid pace. The growth is a clear demonstration of our achievements and motivates us to proceed to another milestone. We are continuing the success and providing other value-added services to existing and potential customers. We expect to get more breakthroughs in next stage."

About China Wireless Communications, Inc.

China Wireless Communications, Inc., headquartered in Denver, CO provides a suite of broadband data services, including support for Internet access and Voice over IP in Beijing, China through its wholly owned subsidiary, In-Touch Communications. We use secure, reliable fixed wireless technology to provide the 'last mile' connection to link bandwidth-hungry businesses to our fiber-optic backbone, and to the networks of our telecommunications partners. Our "Wireless Fiber" services provide the capacity and reliability of fiber-optic networks, over a fixed wireless connection. As a result, we capitalize on faster deployment and maintain targeted capital spending available only through these advanced technologies. Our systems are used to provide redundant high-speed network access connections, Voice over IP and transport services that include IP data, video and ISP services. The Company is publicly traded on the OTCBB under the symbol "CWLC".

Forward Looking Statements:

Statements regarding financial matters in this press release other than historical facts are "forward-looking statements". The company intends that such statements about

the Company's future expectations, including future revenues and earnings, and all other forward-looking statements be subject to the safe harbors created thereby. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company's actual results may differ materially from the expected results.
