## **CHINA WIRELESS COMMUNICATIONS SIGNS SERVICE CONTRACT WITH CHIP MANUFACTURER**

Denver, CO, July 22, 2004, China Wireless Communications, Inc. (OTC Bulletin Board: CWLC) is pleased to announce that it has signed a high speed, broadband service contract with CII Technology Inc (CII), a system-on-chip (SOC) manufacturer in Beijing. China Wireless will provide CII Technology 2 Mbps capacity on its fiber transport. This high speed capacity will allow greater amounts of data to flow to their customers at an economical price which is an integral part of CII Technologies mission to become a leader in providing system-on-chip technology.

Mr. Pete Racelis, President and CEO of China Wireless commented, "More and more customers are using our wireless broadband service. Our reliable services provide a vital link to their customers. We are actively seeking more opportunities in major business districts, including Zhong Guan Cun Area, the 'Silicon Valley' of Beijing, to provide high speed broadband services to meet their business needs."

### **About CII Technology Inc:**

([www.ciitec.com](http://www.ciitec.com))

CII Technologies (CII) is a foreign-invested enterprise founded in April 2002 by a team of seasoned US Silicon Valley entrepreneurs. The company is located in Zhongguancun Science Park in what is referred to as Beijing's "Silicon Valley". The mission of the company is to be a leading provider of System-on-chip for portable telecommunications and multimedia products. Its vision is to bring high-quality portable multimedia and communication devices within the reach of mass consumers to support education, provide entertainment and enhance productivity. CII has an international team located in Beijing, France and US.

### **About China Wireless Communications, Inc.**

China Wireless Communications, Inc., headquartered in Denver, CO provides a suite of broadband data services, including support for Internet access and Voice over IP in Beijing, China through its wholly owned subsidiary, In-Touch Communications. We use secure, reliable fixed wireless technology to provide the 'last mile' connection to link bandwidth-hungry businesses to our fiber-optic backbone, and to the networks of our telecommunications partners. Our "Wireless Fiber" services provide the capacity and reliability of fiber-optic networks, over a fixed wireless connection. As a result, we capitalize on faster deployment and maintain targeted capital spending available only through these advanced technologies. Our systems are used to provide redundant high-speed network access connections, Voice over IP and transport services that include IP data, video and ISP services. The Company is publicly traded on the OTCBB under the symbol "CWLC".

**Forward Looking Statements:**

Statements regarding financial matters in this press release other than historical facts are “forward-looking statements”. The company intends that such statements about the Company’s future expectations, including future revenues and earnings, and all other forward-looking statements be subject to the safe harbors created thereby. Since these statements (future operational results and sales) involve risks and uncertainties and are subject to change at any time, the Company’s actual results may differ materially from the expected results.
