China Wireless Communications Acquires Premier Systems Integration Company

DENVER, March 8, 2005, PRNewswire -- China Wireless Communications, Inc., (OTC Bulletin Board: [CWLC](#)), announced it has acquired a majority interest in Tianjin Create IT Co. Ltd., a new venture enterprise to be formed to operate and enhance the existing business of Tianjin Create Co., a premier systems integration and broadband integrator located in Tianjin City, China.

The acquisition of Create IT Co. results in a company with a strong market position, superior customer service and innovative products and services. This could potentially provide significant value creation through the use of broadband, managed services, security and storage technologies. Create Co.'s customer base includes universities, colleges, enterprise businesses and government clients which required network integration services. These services include, but not limited to the deployment of computer networks, student classroom training to large campus wide area networks. In 2004, Create Co.'s sales revenue grew more than 300% (or \$760,000.00USD) from their previous year.

Pedro E. Racelis III (Pete), President and CEO, commented, "The acquisition of Create IT Co. is an important cornerstone in building an integrated broadband base of new services and technologies with existing educational and enterprise customers. Create IT Co. will become the integrator of our wireless broadband services, which will reduce our costs significantly. Create Co. is well managed, high respected among its customers and technically strong in the engineering and project management disciplines."

Mr Qing Li, President of Create Co. added, "We are extremely proud to join China Wireless Communications to provide the engineering disciplines we have successfully used, as well as gain new capabilities in wireless broadband services. Together, our companies will build a strong foundation of low cost integrated, broadband services that will meet our customers' data, video, and IP requirements."

The strategic advantage of this union will result in solid management of our wireless broadband services, expansion of network services into Tianjin City, and reduce overhead and cost which will result in savings to the customer.

About China Wireless Communications, Inc.

China Wireless Communications, Inc., headquartered in Denver, CO provides a suite of broadband data services, including support for Internet access and Voice over IP in Beijing, China.
